Curriculum Vitae

October 1st, 2021

As an independent, multi-skilled professional of multilingual communication (with Finnish, English, and French as main working languages), I've specialized in translating, editing, and authoring texts that deal with alternative ways of understanding and enacting the economy, financial affairs, environmental and energy-related issues, climate change, political activism, and intimate human relations. I have extensive experience in planning, coordinating and implementing various projects, both independently and in cooperation with others, and of advocacy work through a variety of channels and using a wide range of means. I offer workshops on the subjects within my expertise, and occasionally work as a professional visual arts model.

I'm an enthusiastic subsistence farmer, wild herb gatherer, and amateur fisher. In my spare time I love to dance, roam in the woods, and swim in open waters. My overall objective in life is to promote ethical, mutually beneficial forms of interaction among humans and between humans and members of other species, and to cultivate socially, environmentally and economically sustainable lifestyles both on a personal as well as on a wider, societal level. I'm continuously searching for opportunities to take part in projects that are in line with my long-term goals.
